**Intro to Survival Camp**
This camp is an exciting adventure in experimenting with nature. Instructors with a background in survival and primitive skills use games and scenarios (“what would you do if?”) typically seen on popular TV shows to introduce campers to common but fun and challenging skills. Campers work in teams to solve problems such as how to stay warm and dry in bad weather, basic fire building skills, simple traps and various ways to make rope. Fun games that require campers to learn stealthy movement are a big part of each day. The goal of this camp is to develop social skills and self esteem and to have a lot of fun doing it. This class is structured as a pre-cursor to the Advanced Survivor Camp. Tools to build your own emergency kit available for sale at end of class.

**Ages:** 6-9  
**Date:** 6/20 - 6/24  
**Time:** 9:00 am - 1:00 pm  
**Cost:** $220  
**Course #:** 7091

**Fish Hunters! Fishing Camp**
We will spend the week learning various fishing techniques and visiting different fishing holes in the area. Depending on location we may drive to and from a local fishing hole or creek each day or stay at the park fishing the river. Afternoons are generally dedicated to catching fish and each morning we learn new fishing techniques and tools including fly fishing, fish traps and primitive fishing techniques, cleaning the fish you catch and understanding fishing gear, knots and lures/bait.

**Ages:** 8 - 13  
**Date:** 7/18 - 7/22  
**Time:** 9:00 am - 1:00 pm  
**Cost:** $220  
**Course #:** 7092

**Survival Camp**
This course builds on the beginner class and takes nature exploration to a whole new level. Campers use increasingly complicated scenarios such as being lost, accidents in remote places, dealing with natural disasters (including the Zombie Apocalypse) to develop real survival, disaster response and primitive skills. Improvised and natural shelters, broad approaches to contemporary and primitive fire building, various traps and food gathering/ID techniques as well as orienteering and navigation are taught in detail by experienced survival and primitive skills practitioners. Other more advanced skills (tracking, wilderness medicine, cooking, cordage, stone tools, etc.) are introduced as time allows. The class emphasizes the development of teamwork, leadership and decision making skills as necessary to performing well when resources are few. Prior completion of Introduction to Survival Camp is recommended but not required. Tools to build your own emergency kit available for sale at end of class.
